Index ☐ Volume 38, 1990

ARTICLES *(by title)*

Animation in computer-based instruction, Lloyd P. Rieber, 38:1, 77–86.

Audio-video correspondence and its role in attention and memory, Tom Grimes, 38:3, 15–25.

The Children's Television Workshop goes to school, Cheryl Gotthelf and Tina Peel, 38:4, 25–33.

Commentary: Instructional systems development in the schools, Sharon Shrock and Norman Higgins, 38:3, 77–80.

Community education and child-care programs, Evelyn Payne Davis, Grace Ibanez Friedman, and Laura Martin, 38:4, 45–53.

Design and use of hypermedia systems, Mable B. Kinzie and Richard L. Berdel, 38:3, 61–68.

Doctoral dissertations in instructional design and technology, 1977 through 1988 (Special report), Edward P. Caffarella and Steven G. Sachs, 38:3, 39–42.

Environmental analysis: A neglected stage of instructional design, Martin Tessmer, 38:1, 55–64.

Evaluating instructional software, Robert A. Reiser and Walter Dick, 38:3, 43–50.

Fifty-one families with computers: A study of children's academic uses of microcomputers at home, Joseph B. Giacquinta and Peggy Ann Lane, 38:2, 27–37.

The globalization of *Sesame Street:* A producer's perspective, Gregory J. Gettas, 38:4, 55–63.

Hierarchical structures in expert performance, Thomas G. Dunn and Christine A. Taylor, 38:2, 5–18.

Hypervideo, Craig Locatis, James Charuhas, and Richard Banvard, 38:2, 41–49.

Implications of technological change for higher education reform, Taher A. Razik and Patrick J. Nalbone, 38:1, 65–76.

Instructional development and Third World textbooks, Clifton Chadwick, 38:3, 51–59.

Instructional systems design and public schools, Barbara L. Martin and Rebecca Clemente, 38:2, 61–75.

Instructional systems design and public schools (Response to Shrock and Higgins), Rebecca Clemente and Barbara L. Martin, 38:3, 81–85.

Instructional systems development in the schools (Commentary), Sharon Shrock and Norman Higgins, 38:3, 77–80.

Integrative goals for instructional design, Robert M. Gagné and M. David Merrill, 38:1, 23–30.

Interpersonal skill-building for instructional developers, Ruth V. Curtis and Darlene Nestor, 38:2, 51–59.

A layers-of-necessity instructional development model, Martin Tessmer and John F. Wedman, 38:2, 77–85.

Learning consequences for university students using computerized mastery testing, John P. Lieffeld and Thomas F. Herrmann, 38:2, 19–25.

Native peoples of the Southwest: Development of a multicultural instructional program, Susan L. Shaffer-Nahmias, 38:3, 69–76.

A new model of concept teaching and learning, Martin Tessmer, Brent Wilson, and Marcy Driscoll, 38:1, 45–53.

Protagonist gender as a design variable in adapting mathematics story problems to learner interests, Laura O. Murphy and Steven M. Ross, 38:3, 27–37.

Rapid prototyping: An alternative instructional design strategy, Steven D. Tripp and Barbara Bichelmeyer, 38:1, 31–44.

Requirements and benefits of effective interactive instruction: Learner control, self-regulation, and continuing motivation, Mable B. Kinzie, 38:1, 5–21.

Research and development at the Children's Television workshop, Keith W. Mielke, 38:4, 7–16.

Research and development of print materials at the Children's Television Workshop, Nina Link and Renee Cherow-O'Leary, 38:4, 34–44.

Research in interactive technologies at the Children's Television Workshop, Erik F. Strommen and Glenda L. Revelle, 38:4, 65–80.

Response to Shrock and Higgins: Instructional systems design and public schools, Rebecca Clemente and Barbara L. Martin, 38:3, 81–85.

Role models and student attitudes toward nontraditional careers, Wilhelmina C. Savenye, 38:3, 5–13.

Selected bibliography of research on programming at the Children's Television Workshop, Gloria B. Sammur, 38:4, 81–92.

***Sesame Street* as a continuing experiment,** Valeria Lovelace, 38:4, 17–24.

Special report: Doctoral dissertations in instructional design and technology, 1977 through 1988, Edward P. Caffarella and Steven G. Sachs, 38:3, 39–42.

Wilson, Brent. *See* Tessmer, Martin.

BOOK REVIEWS *(by title)*

Criterion-referenced test development: Technical and legal guidelines for corporate training, Sharon Shrock and William C. C. Coscarelli. *Reviewed by* Jerrold E. Kemp, 38:2, 90–91.
Designing and improving courses and curricula in higher education, Robert M. Diamond. *Reviewed by* Robert Munday, 38:1, 89–91.
Foundations of intelligent tutoring systems, Martha C. Polson and J. Jeffrey Richardson, editors, *Reviewed by* Michael A. Orey, 38:3, 90–92.
Laws of media: The new science, Marshall McLuhan and Eric McLuhan. *Reviewed by* D. Hlynka, 38:2, 87–89.
The Nurnberg funnel: Designing minimalist instruction for practical computer skills, J. M. Carroll. *Reviewed by* Steven D. Tripp, 38:3, 87–90.

Planning effective instruction, Walter Dick and Robert A. Reiser. *Reviewed by* James D. Klein, 38:1, 87–89.
Visuals for information: Research and practice, Rune Pettersson. *Reviewed by* Landra L. Rezabek, 38:1, 91–94.

BOOK REVIEWERS

Hlynka, D., 38:2, 87–89.
Kemp, Jerrold E., 38:2, 90–91.
Klein, James D., 38:1, 87–89.
Munday, Robert, 38:1, 89–91.
Orey, Michael A., 38:3, 90–92.
Rezabek, Landra, L., 38:1, 91–94.
Tripp, Steven D., 38:3, 87–90.

INTERNATIONAL REVIEWS

The benefits of educational technology, by Mohammad Reza Afzalnia, *abstracted by* Mohammad Reza Afzalnia, 38:3, 93–94.
Educating with computers in Trinidad & Tobago, David F. Lancy. 38:1, 98–99.
Educational technology in the Soviet Union, *abstracted by* Stephen T. Kerr, 38:2, 98–99.
Fulbright-Hays awards for graduate students: Obtaining it is easier than doing it, Karen L. Murphy, 38:1, 99–101.
G: An object oriented learning system, *reviewed by* Mark K. Jones, 38:2, 93–97.
The importance and the role of meaningful learning theory in curriculum design and teaching methods, by Morteza Khalkhali, *reviewed by* Mohammad Reza Afzalnia, 38:3, 94–95.
Is there a Fulbright in your future? Marina Stock McIsaac, 38:1, 96–98.
Teleconferencing in distance education in Finland, by Kari Lampikoski and Päivi Sivonen, *abstracted by* Kari Lampikoski, 38:3, 95–96.

RESEARCH ABSTRACTS
(by title)

Application of heuristic methods in the design of intelligent CAI, Dean L. Christensen and Robert D. Tennyson, 38:2, 104.
Assessment and development of student problem-solving skills using computer-managed and computer-assisted instruction, William C. Juchau, 38:1, 104.
A comparison of three computer-generated feedback strategies, David R. Richards, 38:3, 99–100.
The computer in education: An investigation of research dealing with maximizing achievement with CAI, Joseph A. Chamberlin, 38:1, 107.
Control for intelligent tutoring systems: A comparison of blackboard architectures and discourse management networks. Report No. R-6267, William R. Murray, 38:1, 106.
The crisis of distance learning—A dangerous opportunity, Abigail L. Hughes, 38:2, 103–104.
The development and evaluation of an interactive video lesson for use in a general college physics course, Albert E. Cordes, 38:1, 107.
Educational technology research and development in The People's Republic of China, Jiaro Wan and Zhongmin Li, 38:2, 102–103.
Educational videodiscs: The influence of design approaches and school factors on early classroom uses, Karen Janszen and others, 38:2, 103.
The effect of LOGO instruction method on problem solving skills and the relationship of cognitive style on problem solving skills learned through LOGO instruction, Debra Bruene Roach, 38:2, 101–102.
The effects of interactive video on cognitive achievement and attitude toward learning, Suzanne Wegener Soled and others, 38:3, 97–98.
The effects of MCBI program embedded cognitive strategies for performance on verbal and visual testing, William Taylor and others, 38:3, 98.
The effects of selected CAI design strategies on achievement, and an exploration of other related factors, Stephen J. Hines and Steven A. Seidman, 38:1, 105.
Effects on using on-screen learning aids and reading performance, Hsiang-Chi Julie Chu, 38:2, 102.
An examination of two approaches to organizing instruction, John F. Wedman and Patricia L. Smith, 38:3, 101.
Improving the use of technology in schools: What we are learning. Research Bulletin #1, Center for the Study of Education Technology (St. Paul, MN), 38:2, 101.
Incorporating instructional theory in instructional design, James R. Okey and others, 38:3, 100.

Learner versus program control in computer assisted instruction, Mable B. Kinzie and others, 38:2, 100–101.
Manipulating critical variables: A framework for improving the impact of computers in the school environment, Betty Collis, 38:3, 102.
A model computer literacy course, Joseph Orndorff, 38:1, 105–106.
Operationalizing cognitive constructs in the design of computer-based instruction, Gary A. Hettinger, 38:2, 101.
Patterns in students' selection of feedback in computer-based instruction, Barry J. Schimmel, 38:1, 104.
Perspectives on implementation of learner control in CBI, Nancy Higginbotham-Wheat, 38:3, 101.
Preparing schools for the year 2000. The impact of technology on America's classrooms in the decade ahead, Peggy O'Donnell, 38:1, 103–104.
Problem solving interactions on electronic networks, Michael Waugh and others, 38:1, 105.
Programming objects to think with: Logo and the teaching and learning of problem solving, Karen Swan, 38:3, 99.
Radio is an educational medium, Aliza Duby, 38:2, 103.
Science education and the challenge of technology, Marcia C. Linn, 38:1, 106–107.
Teachers and technology: An appropriate model to link research with practice, Stephen T. Kerr, 38:3, 100–101.
Textual design and student learning, Michael S. Parer, 38:3, 98-99.
